## Fraction Squares 1

What fraction of the square is each part?
1.

2.

3.

To help work out the fraction of each part, draw in lines to help your thinking and enable you to see the equal parts or fractions.

This part is one quarter because if you divide the square into 4 equal parts, this is one part. The other side has 3 parts or 3 quarters.

| $\frac{1}{6}$ | $\frac{1}{6}$ | $\frac{1}{6}$ |
| :---: | :---: | :---: |
| $\frac{1}{6}$ | $\frac{1}{6}$ | $\frac{1}{6}$ |

|  | $\frac{1}{3}$ |
| :--- | :---: |
| $\frac{1}{3}$ | $\frac{1}{3}$ |

This part is 2 sixths because if you divide the square into 6 equal parts this is 2 of them, or if you divide it into 3 equal size parts this is 1 of them.
