Fraction Squares 3

What fraction of the square is each part?

1.

2.

3.

To help find the fraction of each part, draw in lines to help your thinking and enable you to see.

This part is one quarter because if you divide the square into 4 equal parts you will see that it is $\frac{1}{4}$.

This part is 3 eighths because if you divide the square into 8 equal parts you will see that it is 3 of them.
