1 2 3 4 5

6 7 8 9

NUMBER
GAMES FOR TWO

Each game needs 36 cards:
4 sets of numbers 1 to 9.
Playing cards can be used.

The 36 cards are shuffled and placed between the players. The first player picks up cards, uses them, & discards them as outlined in the game. When all cards are used, the pile is shuffled and used again.

In classrooms, the cards can be stored with the game or with students, two sets of cards with each student.
